EVENTS MODULE

Let's make an offline version for the system to work with events.
Events module to have:

Have **inventory:-**Main store-Items loaded here will not be accessible on the POS for sales.

        -Items can be loaded through importing.

        -Transfers module- Items from the main store to be transferred to main bar/counters for order placing on POS.

    POS- Point of sale module where different accounts created can place orders.

        -Orders to be printed upon placing orders.

        -Payment mode confirmation

    Orders: Show orders placed in two sections; not completed and completed.

    Reports: Reports to display sales in real time

        -Generate a report for item sales in the below format.

NUMBER	ITEM	SOLD	COST PER ITEM	TOTAL COST
1	MANYATTA	40	350	14000

        -Generate a report for waiter/cashier/bartender in the below format.

NUMBER	ACCOUNT	CARD SALES	CASH	MPESA	TOTAL SALES
1	NAOMI	2000	1000	1000	4000

    The report to be exported either in excel or PDF format.

    Dashboard: To show real time sales, low stock and out of stock, fast moving items to slow moving items.

Don't include the service module for events
